

Table of Types of aggression, intensity/frequency level and age of start

Type of aggression	Level 0-4	Age of start
Education of young / Parental disciplinary and weaning aggression		
<input type="checkbox"/> Parental weaning aggression		
<input type="checkbox"/> Parental disciplinary aggression		
<input type="checkbox"/> Parental educative aggression		
Play aggression		
<input type="checkbox"/> Play-fighting		
Competitive-social aggression		
<input type="checkbox"/> Food-elicited aggression		
<input type="checkbox"/> Non-food object elicited / possession aggression		
<input type="checkbox"/> Resting area-elicited aggression		
<input type="checkbox"/> Social interaction/alliance-control-elicited aggression		
<input type="checkbox"/> Space-control-elicited aggression		
<input type="checkbox"/> Sexual-control-elicited aggression		
<input type="checkbox"/> Other resource-elicited aggression, non-specified.		
<input type="checkbox"/> Dueling fights		
Intrasexual (Intraspecific Intergroup) aggression		
Sexual aggression		
Irritation (irritable) aggression		
<input type="checkbox"/> Frustration-related aggression		
<input type="checkbox"/> Pain-related aggression		
Defense of young		
<input type="checkbox"/> Maternal aggression		
Defense of space / Space-eliciting/managing aggression		
<input type="checkbox"/> Distancing/Deterring aggression		
<input type="checkbox"/> Group-defense aggression		
<input type="checkbox"/> Territorial aggression		
Redirected aggression		
Pursuit aggression		
Critical aggression		
<input type="checkbox"/> Fear-related/elicited aggression		
<input type="checkbox"/> Antipredatory aggression		
Learned aggression		
<input type="checkbox"/> Instrumental aggression		
<input type="checkbox"/> Trained aggression		
Mobbing/ganging		
Infanticide		
Predatory aggressions		
<input type="checkbox"/> Group hunting		
Atypical aggression		
<input type="checkbox"/> Overactivity-related aggression		
<input type="checkbox"/> Somatic disorder-induced hyperaggression		
<input type="checkbox"/> Idiopathic aggression		
<input type="checkbox"/> Dyssocialisation-related aggression		
<p>To study any correlation between the different types of aggressive behaviors, it may be interesting to evaluate the intensity/frequency of the behavior and the age when it started.</p> <p>The level of intensity/frequency can be appreciated on a scale from 0 to 4, with the following value: 0 (lack of aggression), 1 (a little/low), 2 (medium), 3 (high), 4 (considerable/huge) or any other subjective scale such as 0-10 or percentage.</p>
